Fetal Hand, Depth View

Advanced Technologies

● Q-beam

- Compared to the traditional dual-beam former on most ultrasound machines, the QBit uses quad-beam technology for ultrasound signal receiving.
- Doubles the volume of signals received over traditional methods, increasing image resolution and generating more accurate images.
- Produces higher frame rates, ensuring better diagnostic confidence and efficiency, especially for moving organs.

● X-contrast

- The QBit allows one-touch user-adjusted contrast resolution based upon differences in tissue density.
- Enhance, Normal, and Suppress settings increase or decrease contrast resolution, based on the tissue type and user preference.

● Q-flow

- This adaptive color detection technology can automatically adjust the assessment of color signal and noise according to different tissues.
- As a result, color sensitivity of low-velocity flow is significantly enhanced.

● FHI

- FHI is an innovative harmonic imaging technology that uses multiple transmission and receiving methods based on the patients' size and weight. This allows the QBit to maintain image resolution when imaging larger patients.
- Traditional Tissue Harmonics and Phased Harmonics compromise image quality and resolution when penetration is increased.
- Chison's FHI technology greatly improves diagnostic abilities and clinical confidence in larger, difficult-to-image patients.

Cardiology

Performance

MV Short Axis View, B Mode

Aorta Short Axis View, C Mode

MV Regurgitation, B/BC Mode

Aorta Valve, PW Mode

Cardiac Two Chambers, CW Mode

StressEcho

Papillary Muscles, TDI M Mode

MV Short Axis View, Free M Mode

Apical Four Chambers, Color M Mode

Specifications

Professional Clinical Applications

- . ABD
- . OB / GYN
- . Vascular
- . MSK
- . Small Parts
- . Urology
- . Pediatrics
- . Cardiac

Image Processing Technologies

- . Speckle Reduction Algorithm (SRA)
- . Multiple Compound Imaging (MCI)
- . Q-image
- . Q-flow
- . X-contrast
- . Q-beam
- . FHI
- . Super Needle

Imaging Modes

- . B, 2B, 4B, B/M, M
- . CFM, B/BC
- . PW/CW
- . PD, Directional PD
- . Duplex, Instant Triplex, Quadplex
- . Trapezoidal Imaging
- . Curved Panoramic Imaging (optional)
- . 2D Steer (optional)
- . Chroma B/M/PW/CW
- . 4D (optional)
- . Virtual HD/Depth View (optional)
- . Steer M, Color M, TDI (optional)
- . StressEcho (optional)
- . Elastography available on 8 kinds of probes(optional)
- . ECG (optional)
